

Custom designed electromechanical and electronic command and control panels

Caccialanza is organized to design and realize any kind of custom tailor made panel, for installation indoor, outdoor, in hazardous areas or on trucks or vessels.

The panels are realized according to IEC EN60439 standard or according to different or special standards as required by the customer.

Normally all logical functions are performed by programmable logical models inserted in each unit and interconnected via bus, but also conventional panels with pure electromechanical relay logic can be wired if required.

The power section is normally constituted by motor protector switches with power contactors and mechanical interlock if not differently required by the customer.

Only as example of this possibilities a short selection of custom made panels is reported here.

Custom Panels		
Type	Description	Drawing #
	CUSTOM POWER SUPPLY AND CONTROL PANEL FOR 1 MONITOR	46700111
	CUSTOM POWER AND CONTROL PANEL FOR 1 MONITOR	46700112
	CUSTOM POWER AND CONTROL PANEL FOR 2 MONITORS	46700113
	CUSTOM POWER AND CONTROL PANEL FOR 2 MONITORS, NOZZLES	46700114
	CUSTOM POWER SUPPLY AND CONTROL PANEL FOR 2 MONITORS	46700121
	CUSTOM POWER AND CONTROL PANEL FOR 3 MONITORS	46700132
	CUSTOM POWER SUPPLY PANEL FOR 2 MONITORS	46700221
	CUSTOM CONTROL PANEL FOR 2 MONITORS	46700321
	CUSTOM CONTROL PANEL FOR 2 MONITORS	46700322
	CUSTOM CONTROL PANEL FOR 2 MONITORS, NOZZLES	46700323
	CUSTOM CONTROL PANEL FOR 3 MONITORS	46700331
